

# WeatherApp — Documentation

Vilma Pirlä, Valma Haavisto, Aarni Akkala

November 27, 2023

## 1 Software Structure

### 1.1 Class Diagram

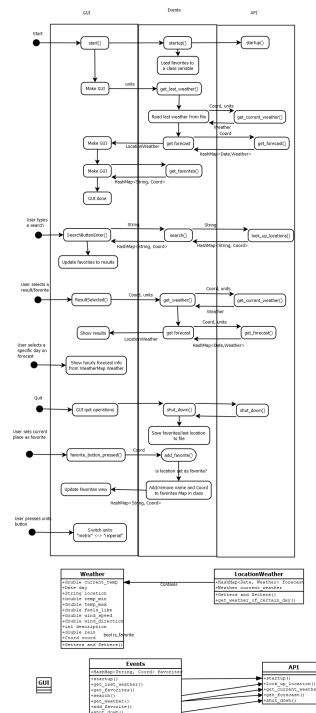

Figure 1: UML Class Diagram of WeatherApp

### 1.2 Class Responsibilities

Provide a brief description of the responsibilities of key classes identified in the class diagram.

## **2 Project Functionality**

Describe the main functionality of the WeatherApp, including any extra features. Use clear and concise language.

## **3 Implemented Classes**

List and briefly describe classes implemented by the team, specifying pre and post conditions where applicable.

## **4 Division of Work**

Provide details on how the work was divided among team members, both agreed and actual.

## **5 User Manual**

Include a short user manual highlighting essential features and how to use the WeatherApp.

## **6 Known Bugs and Missing Features**

Document any known bugs or features that are yet to be implemented.

## **7 Conclusion**

Summarize the key points covered in the document.
